| Cataract Extraction with IOL implant   | $4357 - $5483   | - Supplies       | • Most experienced in minimally invasive robotic-assisted surgery, including general surgical procedures, urological procedures and gynecological procedures. This technique allows for shorter hospital stays, less pain and less blood loss,  
• Bellin is currently establishing a blood conservation program which allows for less blood loss.  
• Surgeons that are nationally recognized for using advanced technology:  
  - General Surgery - Robotic Surgery and Treatment of varicose veins (VNUS)  
  - Urology - Robotic surgery for prostatectomy, Urinary incontinence, Erectile dysfunction and Prostate cancer management  
  - Orthopedic - Arthroscopic rotator cuff repair, Hip resurfacing, Minimally invasive ACL repair, Computer-assisted knee surgery  
  - ENT - Tonsillectomy with coblation, Computer-assisted sinus surgery |
| Avg Cost - $4813                       | - Equipment     |                  |                    |
|                                        | - Pre-op        |                  |                    |
|                                        | - Recovery      |                  |                    |

### Additional Charges (if any)*

In addition to your hospital charge, you will receive a charge from your surgeon and anesthesiologist. If Lab tests are required you will receive an additional charge. If a specimen is obtained during your surgical procedure you will have an additional charge from the pathologist. If x-rays are taken during your procedure you will receive an additional charge from the radiologist.

### Questions to ask as you compare pricing and service

1. What procedures are performed using minimally invasive techniques at your facility?
2. What measures are taken to minimize blood loss at your facility?
3. How many procedures has your facility performed using advance technology?

* This typical charge is based on the average charge for hospital services only and is not a guarantee. This estimate from Bellin Health does not include professional fees for primary care physician, surgeon, anesthesiologist, pathologist, radiologist or any other consulting physician. This estimate has been determined from a sampling of recent, similar cases based on the information provided. Each patient’s experience is different and the actual cost may differ depending on individual needs as determined by the attending physician.

** The Institute of Medicine (IOM) defines quality as “the degree to which health services for individuals and populations increase the likelihood of desired health outcomes and are consistent with current professional knowledge.”
